

DSA0603 - DATA HANDLING AND VISUALIZATION

ACTIVITY-1

NAME:MOHAN RAJ VD

REGISTER NO:192424151

Q2.Bar Chart Average of Student Marks

```
grades <- c("A (90-100)", "B (80-90)", "C (70-80)", "D (60-70)")
```

```
students <- c(8,10,7,5)
```

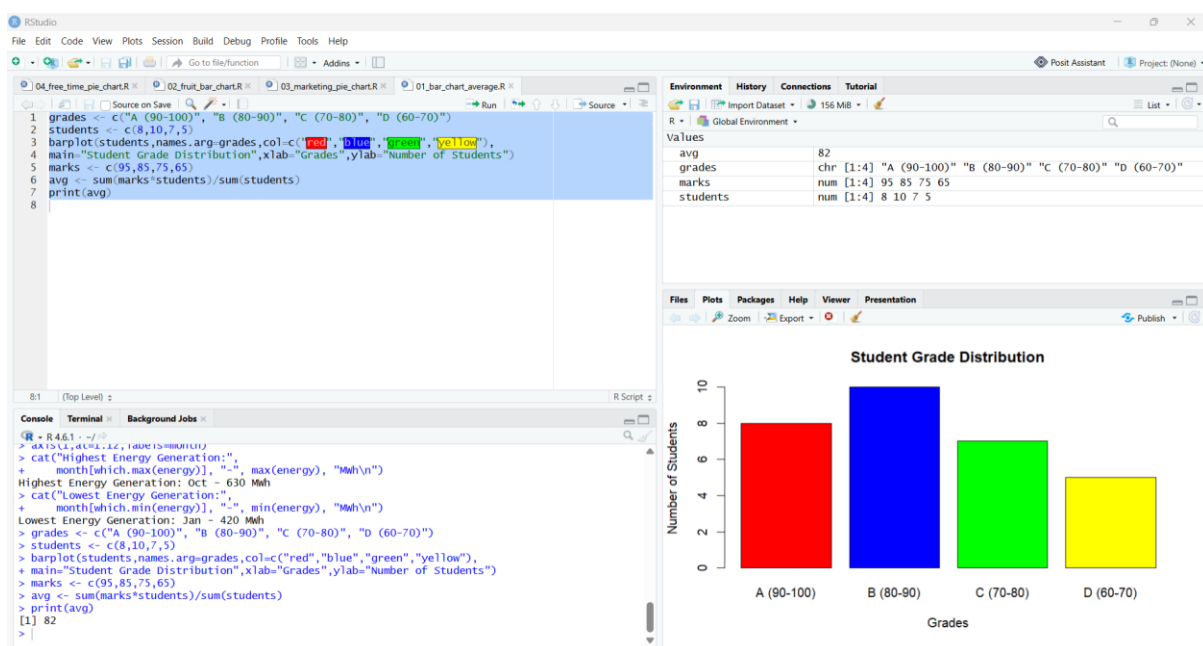

```
barplot(students,names.arg=grades,col=c("red","blue","green","yellow"),
```

```
main="Student Grade Distribution",xlab="Grades",ylab="Number of Students")
```

```
marks <- c(95,85,75,65)
```

```
avg <- sum(marks*students)/sum(students)
```

```
print(avg)
```

Q3.Pie Chart of Marketing

```
dept <- c("Marketing","HR","Finance","IT")
```

```
percent <- c(20,25,30,25)
```

```
pie(percent,labels=paste(dept,percent,"%"),
```

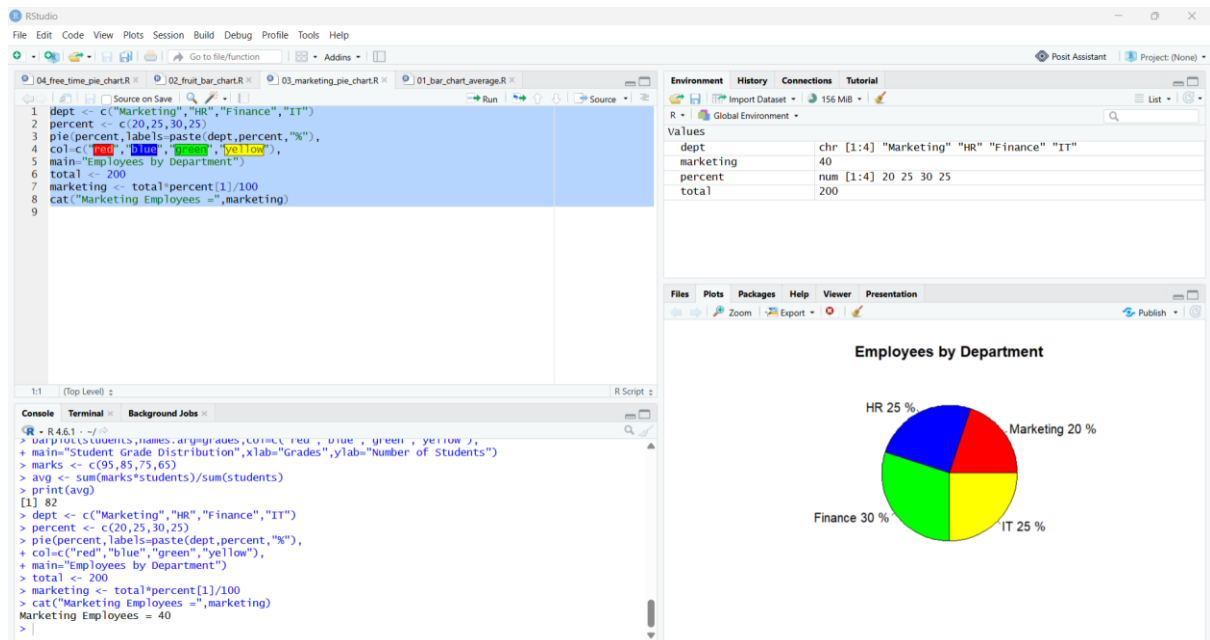

```
col=c("red","blue","green","yellow"),
```

```
main="Employees by Department")
```

```
total <- 200
```

```
marketing <- total*percent[1]/100
```

```
cat("Marketing Employees =",marketing)
```

Q4.Bar Chart of Identifying the most and least preferred fruits

```
fruits <- c("Apple","Banana","Orange","Grapes")
```

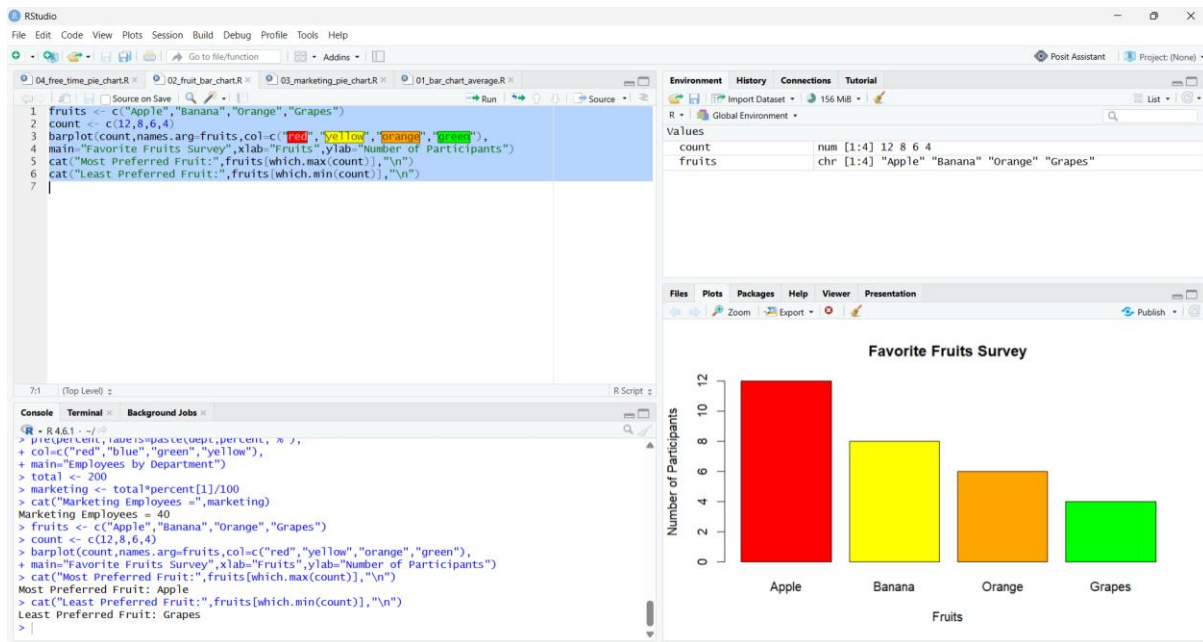

```
count <- c(12,8,6,4)
```

```
barplot(count,names.arg=fruits,col=c("red","yellow","orange","green"),
```

```
main="Favorite Fruits Survey",xlab="Fruits",ylab="Number of Participants")
```

```
cat("Most Preferred Fruit:",fruits[which.max(count)],"\n")
```

```
cat("Least Preferred Fruit:",fruits[which.min(count)],"\n")]
```

Q5.Pie Chart Representation of Employee Leisure Time Analysis

activity <- c("Video Games","Reading","Cooking","Music")

percent <- c(20,35,20,25)

pie(percent,labels=paste(activity,percent,"%"),

col=c("red","blue","green","yellow"),

main="Employees' Free Time Activities")

cat("Most Preferred Activity =",activity[which.max(percent)],"\n")
